

International Academy of Perinatal Medicine

Dear members of IAPM,

One of the very first actions within our global education program will be webinar on

POWER OF FETAL BRAIN – FROM STRUCTURE TO FUNCTION

The idea is that members of International Academy of Perinatal Medicine present their results illustrating strong presence of IAPM in foundation and almost 10 years multicentric research studies.

All members are invited to join webinar. Welcome!

Asim Kurjak

President of IAPM

Webinar:

**AMAZING POWER OF FETAL BRAIN – FROM
STRUCTURE TO FUNCTION**

5 December 2020

Speakers:

1. Asim Kurjak (Croatia): **Fascinating power of fetal brain – are we ready to assess it properly – opening lecture**
2. Milan Stanojević (Croatia): **Why continuous assessment of behavior from fetal to neonatal life is important?**
3. Aida Salihagić-Kadić (Croatia): **From fetal perception to learning and memory - lessons learned and future challenges**
4. Panos Antsaklis (Greece): **Critical analysis of the proven and practical value of KANET**
5. Dorota Bomba Opon (Poland): **Fetal neurobehavioral assessment by KANET test after acoustic stimulation**
6. Vedran Stefanović (Finland): **Magnesium sulphate and fetal neuroprotection: up-to-date**
7. Sonal Panchal (India): **Correlation of Doppler, KANET score and neurological outcome**
8. Ritsuko Pooh (Japan): **Power of 3D neurosonography - Challenge to prenatal neurogenetics**
9. Toshiyuki Hata (Japan): **KANET study in Japan**
10. Radu Vladareanu (Romania): **Monochorionic vs dichorionic twins: KANET test and neonatal neurobehavior**
11. Sertac Esin (Turkey): **KANET test in fetal heart abnormalities**
